Github:github.com/itsrituraz

Third-year B.Tech (Information Technology) student and full-stack MERN developer, building production-style applications spanning authentication, transactional systems, and media platforms. Brief experience in financial & market research; now focused on software engineering roles at the intersection of development and FinTech.

Professional Experience

Finance & Research Analyst Intern

Incline Rise

FEB 2026 – MARCH 2026

Studied macroeconomic indicators and analyzed the impact of global events on financial markets .

Tracked major market indices and evaluated company performance trends.

Prepared summarized reports using Excel and AI-assisted tool

PROJECTS

- **Audora** -- A Full-stack Spotify-inspired music streaming platform (MERN) with JWT auth, role-based access control, music upload, albums/artists, and an audio player; media storage via ImageKit
- **Bank Ledger System** -- Full-stack banking/ledger application (MERN) implementing authentication, ledger entries, and ACID compliant transaction handling. (in progress)
- **Social Media App** — Instagram-inspired platform (MERN stack) supporting post creation, likes, and comments
- **AI Document Screening Platform** — AI-based border security platform with OCR-based document extraction, image tampering detection, and risk scoring for accept/reject/hold decisions
